

iQ Professional Version 2.0 Release Notes

Release Date: 06/02/2025

New Software Features & Improvements

- Stability improvement prevents multiple instances of the software from running simultaneously, resolving crashes and freezes caused by opening the program more than once.
- Chart Function now available.
- Calibration now included.

Minimum System Requirements

- Windows 10 or later
- 4 Gigabytes RAM
- I3 Processor
- 256 Gigabytes of Internal Memory

Known Issues & Limitations

- If loaded onto a Windows Surface Go 2 or 3 Tablet, when entering a New Client, or editing an existing Client, the Gender must be selected first for the on-screen keyboard to properly respond to enter data into the other fields.
- If loaded onto a Windows Surface Go 2 or 3 Tablet, when entering the Birth Date, the on-screen keyboard must be manually selected from the icon in the lower right-hand corner of the task bar.
- Some of the item descriptions on the Emotional Panel are cut-off and not fully visible. A fix is forthcoming.
- Anti-virus or anti-malware software running during use can cause malfunction.
- Pending Windows Updates and driver updates can cause malfunction.
